DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Group A:

Species AI: The specifics being a color filter positioned on the top surface and corresponding to the pixel region shown in Figure 2.

Species AII: The specifics being a micro-color filter corresponding to one of the subpixels shown in Fig. 3.

Also elect one of these:

Group B:

Species BI: The specifics being the transparent substrate is a glass substrate.

Species BII: The specifics being the substrate is silicon.

Also elect one of these:

Group C:

Species CI: The specifics being the micro color filters or color filters comprises a plurality of optical films which are dichroic films.

Species CII: The specifics being the micro color filters or color filters is an optical thin-film stack.

If CII is elected also elect one of these:

Art Unit: 2871

Species CIIA: The specifics being the micro color filters or color filters is an optical thin-film stack which are *low* index optical thin-film stacks comprising of silicon oxide thin films.

Species CIIB: The specifics being the micro color filters or color filters is an optical thin-film stack which are *high* index optical thin-film stacks comprising of titanium oxide thin films or tantalum oxide thin films.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 2871

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
